# Block & Inline
## Conclusions

| BLOCK | INLINE |
|---|---|
| Always start on a new line | Do not start on a new line |
| Take up as much horizontal space as possible (the full width of the container or browser window if there is no container) | Only use as much horizontal space as required by the content. Do not accept width and height CSS properties |
| Will respect width and height CSS properties | Margins will work horizontally, but not vertically |
| Horizontal and vertical margins both work | Padding works on all sides, but the top and bottom may overlap other elements. |
